Southern Gippsland AGRICULTURAL CLIMATE RESILIENCE PROJECT

This is a two year project running until Nov 2016 helping Southern Gippsland food producers adapt to climate change. Through workshops, forums, mentoring and skill development we are aiming for healthy food production systems caring for people, animals, plants and the soil.

Project Events

- *1.15 pm – 12.00 pm* 
  
  **Guest speaker: Jane Bunn (ABC TV Weather Presenter)**
  
  - Diversification of products and or business partners,
  - sharing resources and knowledge, such as local food networks, adding processes, more direct markets for greater value.
  - creating diverse markets for products, such as value adding.
  
  - Bookings: Jill Vella 0408 208 350

- *10.30 am – 11.30 am* 
  
  **Guest speaker: Jane Bunn (ABC TV Weather Presenter)**
  
  - Diversification of products and or business partners,
  - sharing resources and knowledge, such as local food networks, adding processes, more direct markets for greater value.
  - creating diverse markets for products, such as value adding.
  
  - Bookings: Jill Vella 0408 208 350

- *11.45 am – 12.45 pm* 
  
  **Guest speaker: Graeme Anderson DEPI (Seasonal Climate Scientist)**
  
  - critical drivers of seasonal climate variability
  - lead a discussion about some options for farm climate tools/links that will help you both understand weather drivers and obtain information about the latest weather.

- *12.00 pm – 1.00 pm* 
  
  - Bookings: Jill Vella 0408 208 350

Climate Change? Resilience?

- *The graph of average temperatures measured at Wonthaggi from 1892 to 2014 shows that the average temperature has increased by 1.7° since 1892.*

Project Goals

- All of the events are open to everyone. You do not need to be a farmer or have a business plan that may involve farming.
- All of the events are free to attend. All you need is the desire to explore what seasonal climate variability and climate change may mean to your farm. Sessions are designed for farmers to learn about seasonal climate and management options and how to explore these options at the farm level.
- The project also aims to provide support and advice to small businesses in the region that services the food industry. These businesses will be provided with information about seasonal climate and climate change management options.
- The project will also provide an avenue for local producers to tell their story to others who have navigated the challenges of climate change and will provide a forum for sharing information and knowledge.

Bookings: Jill Vella 0408 208 350
