

SOUTHERN GIPPSLAND COMMUNITY ENERGY PROJECT

Information Forums – April

Community energy is when people within the community come together to plan, develop, operate, own and benefit from a large scale renewable energy system, such as solar or wind energy.

Individuals and organisations from across southern Gippsland are working together to investigate project options for our area.

If you are interested in community energy and have skills to offer, we'd love you to join us.

Register your interest or attend a forum.
