

Solar Battery Storage Information Session

The installation of solar battery storage technology is set to revolutionise the way households and businesses use their electricity. A solar powered system coupled with battery storage can provide electricity to your home or business 24 hours a day, but it won't suit everyone's situation.

Event details

Date: 23rd August

Time: 7pm - 9pm

Venue: Dakers Centre
23 Smith St, Leongatha
(Cr Smith St and Watt St)

Free entry and supper provided

Find out from the experts about solar battery storage systems and learn the pros and cons. Is it affordable? What is the latest technology? Will it work for me?
